

Waterjet Maintenance Training Los Angeles Area

OVERVIEW

- Learn, hands-on, how to repair waterjet intensifiers (40,000psi and 60,000psi Flow, [H2O Jet](#) and many Calypso branded waterjet intensifiers), on-off valves, bleed down valves and tubing.
- Meet a [local, independent Tech Service Rep](#) available for support.
- See the latest intensifier and cutting head upgrade options.
- Receive a free high pressure seal kit (\$147 value), maintenance video, maintenance book, certificate of completion (certificates mailed after completion of Training).

H2O Jet, leading supplier of US-made waterjet parts for the automotive industry and a manufacturer of parts for the world's most popular style of waterjet pumps, is providing a Waterjet Maintenance Training Class in the Los Angeles area. The class is intended to help companies reduce downtime, become more self-reliant, lower operating and repair costs, and improve reliability of repairs.

DATES: December 13, 14 and 15, 2011 (Tues-Thurs)

TIME: 8:30a.m.-3:00p.m.

INCLUDES

- Hands-on training and personal guidance (dress to do work)
- Free set of high pressure seals
- Snacks at 2 breaks (on your own for lunch)
- Maintenance book and video
- Certificate of completion

Please Don't Delay!

We need to book space so appreciate your quick response. Also, space is limited to 6 each session for best interaction. The previous session filled quickly.

COST

Before October 31, 2011	H2O Jet Customers	\$200	After November 1, 2011	H2O Jet Customers	\$250
